

A very very slow ride

Heavens, we even got passed by a woman with a child carrier, with child, heading up Old LaHonda! As well as a young kid and Dad on separate bikes. The good news? The woman with child carrier was on an ebike. Better yet, one we sell, the Trek Verve 3+, which was showing off its high-torque motor.

No high-torque motor for Kevin today, as his knee was bothering him again. By the time we got to Tunitas he was looking for the tunnel. Somehow he made it, but he probably weighed well over 200 pounds the last time it took him an hour and twenty minutes to climb Tunitas.
